U.S. Army Corps of Engineers Internship Programs

Mark Twain Lake-March 5, 2008--- Internship programs are the starting points to any career. Spring finds students rushing to find part time jobs. While everyone wants to earn decent money, the focus should be on making a career. The wise choice is to find a working place based on the future career priorities that one wishes to make. Hence, internships are very important.

The Corps of Engineers is an ideal starting point for careers in forestry, biology, marketing, fisheries, math, sciences, environmental science, teaching, park and recreation and more. Internships give students the opportunity to gain valuable experience doing interesting work and networking with great people along the way. Ideally, internship programs give rookies the individual attention they need to help them grow up to the organization's expectation. For more information, please phone 573-735-4097 or email marktwaininfo@usace.army.mil.
